BEEBOT AI

Beebot AI Employee Support

" **Connecting the dots between your people, systems and processes using AI powered platform technology** "

The Next Generation of Employee Support

92% of HR leaders believe the future of providing excellent employee service has to include chatbots. (ServiceNow, 2019)

67% of survey respondents believe it would be easier to focus on work if important information from all their apps appeared in a single window. (Business Wire)

46% of employees feel that digital tools make them more productive! (Gitnux)

92% of employees say having technology that helps them do their job efficiently affects their work satisfaction. (Ultimate Software)

Hello, I'm Beebot, your employee support assistant

Why choose Beebot AI?

Our intelligent automated platform provides HR teams with a next-generation employee support system. Providing on-demand personalised assistance to each employee and saving HR teams valuable time, increases productivity and generates employee satisfaction. Our platform enables your employees to focus on the work that matters.
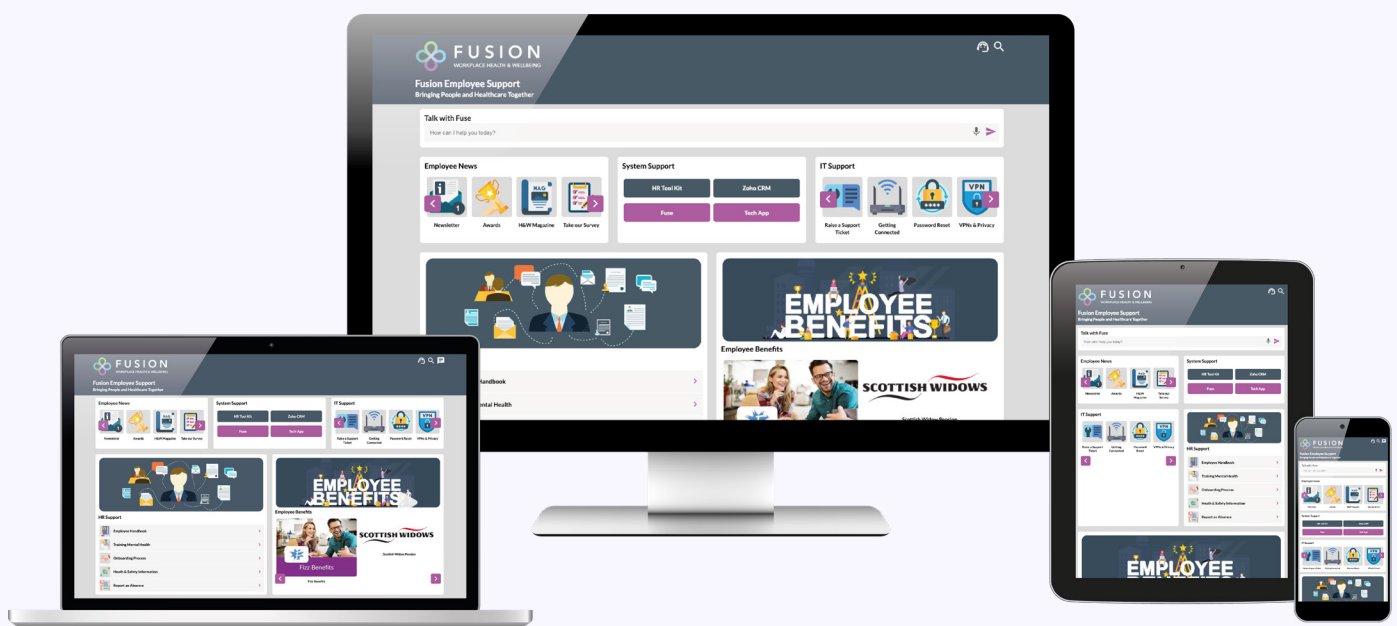

Powered by AI technology our employee support interface can help you and your team to recruit, onboard and manage the employees within your organisation through an easy-to-use platform, tailored to the needs of your business.

What does the Beebot AI platform do?

- **'Do it for me'** – A unique feature which enables an AI bot to make changes to your systems and documents upon request of the user.
- **Employee interface & Smart Nav** – Navigate users to process pages and reduce the time spent finding information
- **Virtual Personal Assistant** – Add tasks to your 'to-do' list and get them relayed in a quick and timely manner
- **Guided support** – Guided learning on key process steps and quick tips on the best and most efficient ways of doing things
- **Links to all systems** – Your platform can provide a single point of access on any device through to any software systems you currently use for example HubSpot, Sales Force, Workday, Microsoft, Zendesk etc
- **Smart Answers** – Allows robots to read documentation and provide instant answers to queries

Works on any device.

What can I use the Beebot AI platform for?

Our intelligent automation platform provides your business and employees with endless possibilities on the capabilities it can deliver. Its primary aim is to increase employee productivity, reduce IT & support costs and decrease process completion time. Standard operating tasks the platform can operate include:

Recruitment – Automate & streamline candidate screening, appointments, interactions, and selection

Onboarding – Automate and track a tailored new employee onboarding process from start to finish

FAQ & Policy – The platform can help employees get answers quickly and efficiently 24/7 taking the strain off general HR enquiries

HR admin tasks – Save time with our solution by allowing it to make changes to documents, generate contracts and perform general HR admin tasks

System support – Provide a guide to employees on 'how to do...' as well as performing tasks on their behalf

Navigation of information – Navigate ALL software systems within the company through one easy to use simple platform

Induction – Provide an intelligent induction process for all employees. Make it interactive with a selection of videos, documents and tasks to induct new employees

Compensation & benefits – Our intuitive AI based system can guide employees through benefits, 'do it' for them and send notifications

*If you don't see a task above that you want to streamline within your business, then why not give us a call and see how our intelligent automation platform can be tailored to connect the dots between your people, systems and processes

What are the benefits of using Beebot AI's employee support platform?
